

# ADVANCED BEGINNER HALF-MARATHON TRAINING SCHEDULE

Use this schedule if you've already run at least one half marathon (13.1 miles) road race, or you've done a 5K or a 10K and you're ready to race a half marathon.

This schedule is geared toward runners who can run 4 miles comfortably and can run 4 to 5 days per week.

## NOTES ABOUT THE SCHEDULE

### Mondays and Fridays

Mondays and Fridays are usually rest days. Don't ignore rest days – they're important to your recovery and injury prevention efforts. Your muscles build and repair themselves during your rest days. You're not going to gain much strength and you're increasing your risk of injury if you don't take some rest days.

### Tuesdays and Saturdays

After you warm up, run at a comfortable pace for the designated mileage.

### Wednesdays

Do a cross-training (CT) activity (such as biking or swimming) at an easy to moderate effort for 45 to 50 minutes.

### Thursdays

At Week 4, you'll start to do race pace runs. After a one-mile warm-up (WU), run for the indicated distance at your half-marathon race pace. Then run a one-mile cooldown (CD) at your easy, conversational pace. If you're not sure what your half marathon pace is, run at a speed that you think you could hold for 13.1 miles.

### Sundays

Sundays are active recovery days. Run at an easy (EZ), comfortable pace to help loosen up your muscles.

### Note

You can switch days to accommodate your schedule. So, if you prefer to workout on a Monday or Friday, it's fine to swap a rest day for a run day.
